Welcome home

Product featured: Trilock Eclipse Allure

At Gainsborough we're all about opening a world of new style possibilities in door and access solutions.

For over fifty years we have built our reputation on developing and producing leading-edge door hardware - innovative levers and locks that work silently to reflect your style and needs.

With Gainsborough, you don't need to sacrifice style for security, because we know the most important thing isn't what's on your door, it's what's behind it.

Finding your style

Gainsborough has solutions for all of your entire home. Making the right selection is important. Finding your external, internal or personal style hardware begins here.

The finishing touch that adds style, convenience and peace of mind to every home.

Product featured: Avant Rivera Large Rose.

Contemporary *style*

Door furniture shouldn't be an afterthought.

We pride ourselves on being at the forefront of design trends, consistently ensuring our products use the latest in contemporary materials and finishes.

Our products add the perfect finishing touch to any home or building, from the first impression of the entryway, to small accents of style in any room. And with our finger on the pulse, we're ready to adapt to the latest trends and continue to bring Gainsborough's signature style to Australian homes.

Making life *easy*

Gainsborough's products are made for everyday living.

Our focus is on people, and creating products that make their lives easier. It's why we invest in the latest technology that makes style and security simple from the first install, to coming home every single night.

Our goal isn't to complicate our customer's lives with the latest gadgets, but to simplify and improve their day-to-day through user friendly products, bringing innovation and convenience.

Peace *of mind*

For over 50 years, we've been proud to keep Australian families safe and secure in their homes.

It's a responsibility we take seriously, and it drives us to develop products that not only look great, but function as reliable, secure and trustworthy elements of your home. Peace of mind is built into every product.

Gainsborough is the experienced and trusted name in door furniture that protects Australian homes and families.

Selecting your product

Choose the right products for every application.

Gainsborough offers a broad range of products to suit applications throughout the home. The following shows a house plan and serves to indicate the Gainsborough products available to suit the relevant door in the home. Page numbers are also shown adjacent to the products concerned, in order to provide you with an easy to find reference guide.

Select the right hardware for your door.

Award winning
innovation

Gainsborough is proud to be a market leader in innovation. Our award winning QuickFix™ and Freestyle™ technologies are just another way we make people's lives more convenient.

GAINSBOROUGH
freestyle

Smart locks that look smart.

The new Gainsborough Freestyles Electronic Trilock™ combines signature style with the latest technology.

Whether it's checking if you've locked the house, or if your family has arrived home, this smart lock gives you unparalleled convenience, peace of mind, and the freedom to move.

- Trilock®'s 3-in-1 functionality, with smart technology
- Keyless Entry via keypad or app
- Remote access, lock, deadlock or unlock your door using the Gainsborough Freestyle app on your mobile device.

Named the 'Smart Lock of the Year' by the international IoT Breakthrough Awards 2021.

TRILOCK

3 in 1 entrance sets.

Trilock® combines style and function for the Australian home.

Trilocks secure more new front doors in Australia than any other lock with its unique 3 in 1 technology.

- The push button lockset mode from inside of the door features a privacy button by simply turning the inside knob or lever
- Lever can easily be rotated during installation for use on left or right hand doors.

Gainsborough
Trilock
Licence No. 98713
Standards Australia

The Trilock '3 in 1' locking mechanism has been awarded with an Australian Design Mark® for Good Design by Standards Australia.

Quick™
Fix

Innovation in installation.

The new QuickFix™ technology makes fixing door hardware a simple process of positioning, twisting and securing hardware onto the door.

- Brand new patented fixing design
- Installation in under 30 seconds (after latch and strike installation)
- No need to cut screws for different door thicknesses
- 2019 Good Design Award Australia winner.

Awarded a 2019 Good Design award for 'Outstanding Design and Innovation'.

The Gainsborough Freestyle Electronic Trilock® combines Gainsborough's signature style with the latest technology.

Whether it's checking if you've locked the house, or if your family has arrived home, this smart lock gives you unparalleled convenience, peace of mind and the freedom to move.

Enjoy Trilock®'s 3-in-1 functionality, now with Bluetooth smart technology.

Freestyle Trilock

Features

-  Encrypted connection for advanced security
-  Remote access, lock, deadlock or unlock your door using the Gainsborough Freestyle app on your mobile device*
-  3-in-1 Function (Passage/Privacy/Dead Lock)
-  Keyless Entry via keypad or app
-  Monitor your lock status
-  Battery operated using 4x AA alkaline batteries for up to 12 months with normal use
-  Assign, invite and schedule up to 20 users
-  Emergency override keys included

*When used with the Gainsborough Freestyle Wi-Fi Bridge

Easy to install

The Gainsborough Freestyle Electronic Trilock® can retrofit existing mechanical Trilocks and many other standard knob and lever entrance sets.

3 in 1 *entrance gets*

TRILOCK

Trilocks secure more front doors in Australia than any other lock with its unique 3 in 1 technology.

Choose from the classic chic of the Trilock Traditional, the sleek, modern look of Trilock Contemporary, minimalist aesthetic of the Trilock Eclipse, through to the premier style and engineering of the Trilock Omni Pull Handle.

Trilocks set the standard from your front doorstep, inspiring you to express your signature style with complementary levers throughout your home. All Trilocks feature state of the art tarnish-resistant finishes that can be matched in look and feel to your favourite interior levers.

Gainsborough *Trilock* design offers a combination of lockset, deadbolt and passage functions in one system.

The push button lockset mode from inside of the door features panic release by simply turning the inside knob or lever.

Levers can be easily rotated during installation for use on left or right hand doors.

When unlocked and unsnibbed, Trilock operates as a normal passage set.

Lock body readily replaces old keylocks fitted to a standard 54mm hole.

Single handed operation (key operates all functions of the lock).

Deadbolt 20mm throw for extra security.

Solid brass double 5 pin Euro profile cylinder can be keyed alike to other Gainsborough products for same key convenience.

The Trilock '3 in 1' locking mechanism has been awarded with an Australian Design Mark* for Good Design by Standards Australia.

Lockset with safety

Pressing the button on the inside of the door engages the Trilock lockset mode. This locks the door from the outside, however it is safe to exit without a key in an emergency by simply turning the inside knob or lever.

Deadbolt security

Trilock houses a key-operated double cylinder deadbolt, with a sturdy 20mm throw, to keep possessions and valuables safe whilst the home is unoccupied. Single cylinder version features inside turn-button.

Passage set convenience

When Trilock is unlocked and unsnibbed, it operates as a standard passage set, allowing free access in or out of the home.

Exterior side	Interior side	
		DOUBLE CYLINDER Key from either side will lock or unlock deadbolt.*
		SINGLE CYLINDER Key from outside or turn-button from inside will lock or unlock deadbolt.*
		DUMMY SET A non-operational handle set for the fixed side of a double door.

*ALSO FEATURES OTHER FUNCTIONS:
 • Push-button lockset mode
 • Passage set convenience when unlocked and unsnibbed.

Match with Aurora leverset. See page 39.

TRILOCK

Omni & Omni Accent

The Trilock Omni makes a statement entrance on large format doors.

This pull handle range makes a statement entrance on both large and small format doors with its style and elegance, combined with the trusted Trilock 3-in-1 technology.

Featuring a 600mm pull handle with a cleverly concealed lever on the exterior, the Trilock Omni is the perfect solution for a minimalist look. Create the same aesthetic for standard doors with the Omni Accent featuring a 450mm slimline pull handle.

Available in Double Cylinder and Dummy Trim options.

Match with Allure leverset. See page 49.

Care and *maintenance*

General Care

Gainsborough suggests cleaning knobs, roses and plate every two months with a soft, damp cloth. A solution of soap and water could also be used to remove dirt from knobs, roses and other surfaces, but should not be used on cylinders. Ensure liquid does not enter cylinder at any time.

When cleaning, avoid using acidic or abrasive substances which may contain solvents, i.e. cleaning products, as such substances may cause a deterioration of the finish.

Cylinder

When key becomes “sticky” in cylinder, you may sprinkle a small amount of graphite onto the key and then insert the key inside cylinder. Do not use lubricant in cylinder (oil or aerosol type).

Locks

Gainsborough and Austral lock products are manufactured using a quality lubricant for smooth operation. If the product has been installed in a region subject to extreme climate or subject to a dusty environment, then such conditions may affect the original lubricant and therefore the product may require re-lubrication.

In this case, the working mechanism may be cleaned with a non-corrosive substance and then re-lubricated with a quality silicone or Teflon based lubricant. Do not use lubricant in cylinder (oil or aerosol type).

Caring for Stainless Steel

Depending on the environment where the product is used, blemishes can appear on stainless steel product. To help prevent this occurring, clean once a month. Blemishes on satin stainless steel may be removed by rubbing with a suitable stainless cleaner/polish such as Eagle One Original Never-Dull Wadding polish or Brite Shine Wadding Polish. Ensure rubbing occurs in the same direction as to the grain itself.

Caring for Solid Brass

Solid brass products are coated with a durable baked on clear protective lacquer which will significantly retard but will not permanently prevent tarnishing. Coated brass items should be wiped with a soft cloth and occasionally polished with a good non-abrasive wax (following manufacturer’s directions.) NEVER USE ABRASIVE CLEANERS OR POLISHES ON A BRASS ITEM WITH A PROTECTIVE COATING. Solid Brass can be restored to its original appearance and resealed but it inhibits the product’s warranty.

Remember, the nature of brass is to tarnish. The beauty of brass is that it can always be restored to its original finish. Breakdown of the lacquer coating, or natural tarnishing, to which brass is subject, in no way indicates a deterioration of the basic product.

Warranty

50 TRUSTED FOR OVER FIFTY YEARS

Allegion warrants its products to be free from defects in material and workmanship for the stated periods from the date of purchase. Allegion will, at its option, repair or replace any products which in the opinion of Allegion are found to be defective, provided said products are returned to Allegion, freight prepaid. Allegion reserves the right to inspect the installation of defective products before any removal and return of any such products. This warranty excludes deterioration of decorative finishes, unless those finishes are specifically listed in the product warranty.

Product featured: Allure Passage Round Leverset.

glossary

Common Terms

Backset - the distance from the edge of the door to the centre of the hole for your lever or knob.

Cylinder - the cylindrical shaped mechanism housed within door locks that contains the tumbler and keyway, into which a key is inserted to operate the lock.

Deadbolt - a bolt engaged by turning a knob or key, rather than by spring action.

Door Preparation - the cut-outs or holes made to the door for the lock and/or lever being installed.

Dummy / Dummy trim - A face fixing lever or knob that matches your passage and privacy sets, for a cupboard or wardrobe door. Usually sold as singles not pairs and does not come with a latch. When supplying a dummy set for a right door you will need a left hand dummy set and vice versa for a left door.

Escutcheon - a cap that covers the base of a key cylinder (not to be confused with Rose as below).

Jamb - the frame that surrounds the door in the doorway.

Latch - the mechanism that slides into the edge of the door and retracts or protrudes with the turn of the doorknob or lever. The latch keeps the door closed and allows it to open.

Mortice Lock - a lock which is set within the body of a door in a recess or mortice, as opposed to one attached to the door surface.

Rose - a cap that covers the base of a door handle allowing concealed fixing screws.

Roller catch - has a spring-loaded roller held within a cylinder attached to a flange. The catch is recessed into the edge of the door while the striker plate is recessed into the jamb. Usually used with a dummy trim or pull handle.

Stile - the vertical edge of the door where door furniture is fixed. A thin stile i.e. one with a glass pane near the edge of the door may have implications for which backset can be used.

Strike / Strike plate - the metal piece attached to the door jamb. As the door closes, the latch mechanism strikes the plate mounted to the jamb and the strike plate catches the mechanism and holds the door closed.

Turn - a small interior piece that can be turned with your finger and thumb to lock or unlock a door lock.
