Alyssa Barr

Architectural Designer, New Zealand

0.02

Alyssa Barr is an Architectural Designer based in the small rural town of Hāwera, in the North Island of New Zealand. She worked with Parkwood Doors to bring one of her recent residential projects to life.

Alyssa and her client chose one of our aluminium styles, the HV3, as the home's external door. "The contemporary look of the Parkwood Doors HV3, and its horizontal lines, complemented the home's other surfaces.," said Alyssa.

Parkwood Doors' aluminium styles are "strong and hard-wearing, so they can withstand all the weather conditions that Taranaki (a coastal, mountainous region in the North Island of New Zealand) is known for."

Materials

0.03

Alyssa chose Parkwood Doors for the "...quality product and service they provide. Their innovative products, like the Thermtek Aluminium doors, are aesthetically pleasing, while creating warm homes that are H1 compliant."

X Parkwood

Exterior

0.04

Custom powder coating allowed Alyssa to match the home's external door, the HV3, with the home's aluminium windows and its roof.

"The door's thermally-enhanced properties reduce condensation, and work with the new H1 requirement."

Interior

0.05

The project's refined, modern, and minimalistic colours and textures matched perfectly with Parkwood Doors.

"The contemporary look of the HV3, and its horizontal lines, complemented the home's other surfaces."

Stylish, Stable, Secure

Aluminium

Enduring Aluminium

Our aluminium doors are more stable than their wooden counterparts, and just as stylish. They're perfect for exposed locations, or those demanding heightened security. Plus, our innovative Thermtek options are thermally-enhanced.

Choose Thermtek

Thermtek is our patent-protected, thermally-enhanced aluminium technology that keeps cold outside and warmth inside, or vice versa. Behind their stunning exterior you'll find premium thermal insulation and innovative connectors that allow tiny expansions and contractions with temperature, keeping the door straighter and more stable. Thermtek doors are less likely to accumulate condensation, and they create a superior noise barrier, compared to other aluminium doors.

Key Features

Thermally-enhanced

Superior noise barrier

Custom powder coated

10 year warranty

BAL compliant range with options up to BAL40

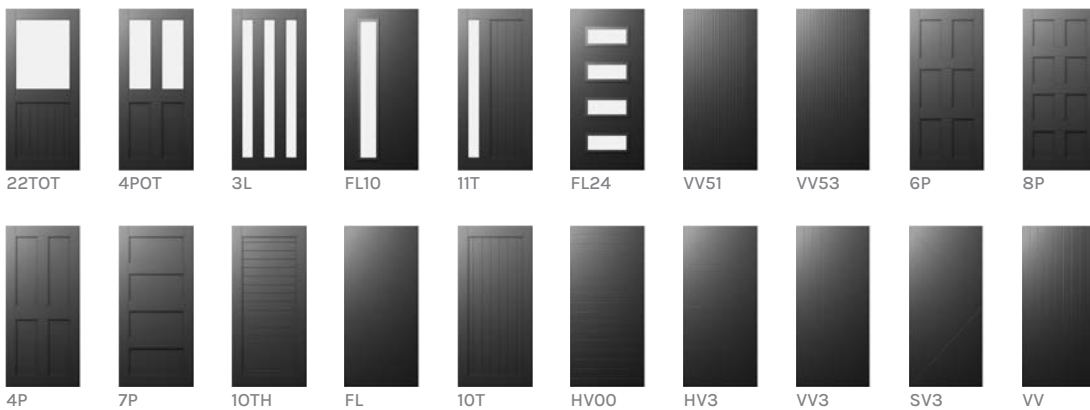

FITS YOUR VISION

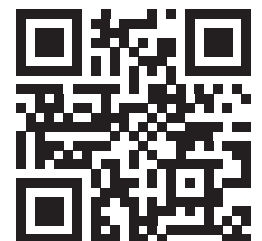

The form of our aluminium doors is just as impressive as their function. Our range of over 50+ architecturally-inspired styles and sizes can be powder coated to match your colour scheme, or printed with a lifelike woodgrain.

Crafted, Comfortable, Classic

Timber

Hand-crafted Timber

Our high-quality timber doors are made-to-measure and crafted by hand.

The Craft

Our wooden doors are made with the finest, sustainably-sourced timbers. They're kiln-dried and moisture tested to ensure strength and rigidity. Designed for weather-protected entranceways, they aren't suitable for extended periods of direct rain or sun.

Key Features

Hand selected timber

Colour matched

Kiln-dried and moisture tested

5 year warranty

BAL compliant range with options up to BAL29

SOLID IN FORM

Our hand-crafted timber doors are available in 5 solid and sustainable timbers, from beautiful blondes through to reds and classic browns. This includes a thermally modified and laminated Vulcan.

More Than Doors

Our full range includes internal doors, hardware, louvres and shutters that complement the materials and finishes of our doors.

Barn Doors

01

A sliding barn door can provide great space economy, as unlike a traditional swinging door which typically requires 2-3 metres of clear space, a barn door only requires wall space.

Our barn doors can be tailored to suit the style of a home, whether that's rustic with traditional wood, or painted to provide a more modern look.

AR43B with HABARNCLSS track

Louvres and Shutters

Our louvres and shutters can enhance every room in a home. We use only the finest timber, and our products are known for their strength and durability. The timber can even be matched to complement the grains and colours in the rest of your architectural design.

02

Hardware

03

We complement our doors with hardware that completes your entranceway, from popular grip-sets to modern pull handles and lock sets. We can also machine out space for your lock, saving you the hassle and risk of machining on site.
