

ZANDA
ARCHITECTURAL HARDWARE

More than quality
- an experience

Seamlessly blending style with quality, these products are at the forefront in architectural finesse and form and are only available from...

Zanda Architectural Hardware is pleased to present in this catalogue an unparalleled selection of genuine, superior, quality door furniture and accessories especially chosen to compliment the high standard of architecture found in today's homes and buildings.

Zanda is a family owned Australian company with the experience and expertise essential for providing the efficient and courteous service that attracts and retains satisfied customers. Today the Zanda name has developed a strong sense of corporate identity and become renown for its commitment to continuous improvement.

We invite you to peruse the range, make your choice and compare the difference.

Our Vision

- To become a household name by providing exhilarating service, high quality products, products that never were and a compelling alternative in order to develop long term partnerships that create prosperity and fulfilment for all.
- To enable, ennoble and enrich everyone in our organisation, and to enrich others by contributing towards charitable causes and humanitarian needs.

Our Mission

To become the 'go-to' company for independent resellers, architects, interior designers, builders and end users by providing:

- High quality architectural hardware along with unique designs and exhilarating service.
- A compelling alternative to the independent reseller which enables them to compete with the big box stores.

Corporate Culture

The determination to go beyond what our customers would ever expect by offering amazing service, unique designs and superb quality so that every person and organisation we deal with says 'wow'.

Dear Reader,

What do you get when you deal with Zanda?

Every purchase is based on trust. Trust that you will receive good quality, good service and good value.

We respect that trust and it is our commitment to never let you down.

That is why we have such a strong and compelling reason to go beyond what our customers would ever expect by offering amazing service, unique designs and superb quality. As the owner, it is my responsibility to ensure that every person and organisation with whom we deal is uplifted by the experience.

We come from a long history of serving customers. Our parent company was founded in 1927. You don't get to keep a family company for nearly 90 years by being indifferent to the customer.

We give you our word, that should you trust us with your valuable custom, we will stand behind our commitment to ensure that you truly will say "wow".

Very Best Regards

A handwritten signature in black ink, appearing to read "Bill Wallis", written over a thin, curved line.

Bill Wallis

Founder & Managing Director

ZANDA
ARCHITECTURAL HARDWARE

WHICH ONE ARE YOU? - CHECK OUT YOUR BENEFITS!

An Owner?

- **Absolute peace of mind** - unsurpassed quality, the minimum warranty is 10 years through to high end products with an amazing lifetime warranty!
- **Exhilarating designs** - find your exact taste amongst hundreds of the finest products in this catalogue.
- **The very best professional advice** - deal with the very best and most passionate, handpicked resellers who specialise in door hardware and who only sell the best.

A Reseller?

- **Unparalleled service** - we dispatch within two hours of receiving the order!
- **Easy communication** - someone will answer the phone within eight seconds and...it's a real live person!
- **Exclusive to you** - we don't sell to the big box stores! Protect your margin, your image and your name by selling a renowned product that can only be purchased through you.
- **Superior products** in terms of quality, designs and range.
- **Unique styles** that differ from the tired and stale brands
- **Superior packaging & point of sale material** that lifts your store and helps market the product and boost your sales.

An Architect or Interior Designer?

- **Unique styles** - at last a breath of fresh air with unique products that suit all architectural styles
- **Form and function epitomised** in a range that encompasses everything from Classical to Sublime and from Art Deco to Modern and everything in between.
- **Free scheduling** - we guarantee we'll complete a comprehensive door hardware schedule in seven days.
- **Free samples** - where applicable Zanda can provide samples to assist in your selection process.
- **Ease of communication** - ring for advice on placement, styles, technical information or pricing.

A Builder?

- **Save money** - save money with the fastest and easiest to fit door furniture on the market and a price point for every client.
- **Save time** - never get held up on site again. We dispatch within two hours of receiving the order!
- **Boost sales** - with the best quality and range and an exclusive brand, you will never look back.
- **Add class** - If all of the above is not enough, add one of our awesome displays (see page 133) to your display room to add some zing to your samples and give your clients the ultimate choice.

First impressions count. That's why more architects and designers are specifying Zanda Pull Handles in some of Australia's finest buildings. Appearance, durability, versatility, ease and flexibility of installation are just some of the qualities that have transformed our Pull Handles into an industry mainstay.

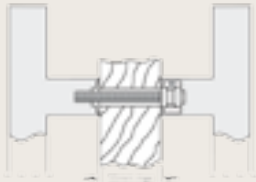

Our unique range comprises of 17 different styles and 52 different sizes ranging from 300mm right up to 1800mm in length.

What's more, all of Zanda's Pull Handles are constructed from 316 Marine Grade Stainless Steel making them ideally suited to corrosive applications or high humidity situations.

- » Suitable for aluminium joinery
- » Can be powder coated to match your joinery
- » Compatible with 30mm lock backset (except Luna and Avante 35mm)
- » Hardware can be modified to suit other locking systems including oval profile cylinder
- » Hardware can be modified to multi-point locks. To modify Astron longplates, use code 1274. These codes must be specified at time of ordering as the modification has to be done in our factory. A small charge applies for this modification.

DOOR FURNITURE - FUTURA

Futura, as the name implies, is an exquisite range of door furniture that harnesses the past and heralds the future. Using sleek design concepts, this range embodies the form and function that are the hallmarks of Zanda products. The subtle infusion of bright chrome compliments the alluring beauty of brushed nickel to make the Futura range breathtakingly elegant.

Finishes: SC, PB

These Door Stops provide the perfect solution for areas where door opening is restricted. Toilets, showers, towel rails, tiled floors with underfloor heating or any other application where a floor or skirting mount stop is not suitable. You won't trip over these and installation is easy.

Hinge Pin Adjustable Door Stop

5277

Operates from approx 85 - 125 degrees using threaded adjuster.

The hinge pin door stop can be mounted on any loose pin hinges.

Overhead Door Stops

5263L
Use on doors hung as shown

5263R

- Screws to door head jamb.
- Angle of operation: Minimum 70°, Maximum 120°
- This is dependent of position on door jamb
- Stainless Steel finish
- 157 x 46mm

*Discontinued, limited stocks available

DOOR CONTROLS

Rutland is a manufacturer of high quality and efficient door closers and controls. Based in England, Rutland distributes through a network of dealers throughout UK, Europe & USA. Zanda Architectural exclusively distributes a select collection of Rutland door controls suited for the rigours of Australian conditions and standards. Through continual investment we are not only improving our products in their ability, design, performance and reliability, but also through innovation our products have become faster and easier to fit making them the first in demand and specification. From Buckingham Palace to the largest shopping center in Europe, Rutland products feature on millions of doors worldwide. In fact, a Rutland door closer is currently sold every 31.57 seconds.

Finishes: SS

PS.240 - Fixed Top Centre Pivot (15mmØ)

Finishes: SS

Emergency Release Door Stop

TH.107 - LOCK IN & OUT

FEATURES:

- Use in conjunction with a pivot set
- Allows double action door to operate as single swing, when hung on pivot doors
- Emergency access is gained by depressing the stop and pulling the door outward.
- Includes hold back facility
- Stop release resets automatically
- Maintenance free - 10 year warranty
- 304 Grade Stainless Steel

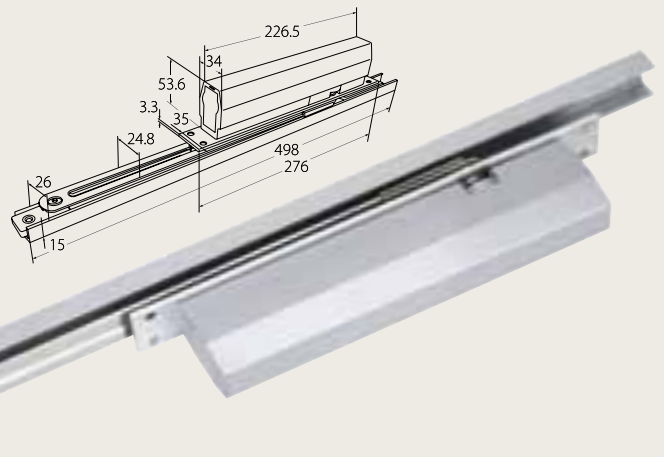

Door Controls > Genie Door Controls

Genie Door Controls

G555

FEATURES:

- Completely concealed into either jamb or top of door
- Extremely smooth and efficient operation and extremely easy to open and close—ideal for the elderly or less abled
- Tested to 300,000 cycles
- Adjustable speed
- Hold open at 90 degrees, opening angle 180 degrees
- 100kg weight rating
- Minimum door thickness 45mm (if installing closer into door, not jamb)
- Unit comes complete with slide arm and fixings

G500

Concealed closer
includes hydraulic power unit,
top pivot fixing bolts & screws

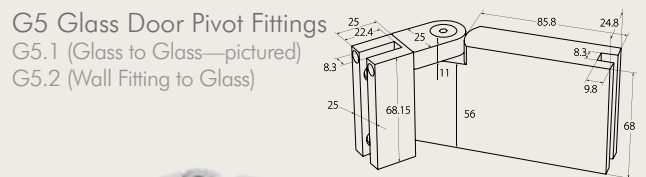

FEATURES:

- Revolutionary patented new concept
- Pivots at top & bottom of door
- completely concealed
- Torque & speed adjustments
- Pivots both ways
- Hold open at 90°
- 10 year warranty
- Rated 80kgs

G5 Glass Door Pivot Fittings

G5.1 (Glass to Glass—pictured)
G5.2 (Wall Fitting to Glass)

Bottom Pivot

Top Pivot

FEATURES:

- Pivots at top and bottom, looks very neat
- Revolutionary new concept which replaces conventional glass pivot closers
- Good for child finger protection
- Auto closing and always returns to the exact closed position
- 50kg weight rating
- Efficient and very easy to open

LETTERBOX HARDWARE

Zanda's range of numerals are manufactured from solid brass material, then electroplated offering maximum durability against rust and harsh weather conditions. Supplied complete with fixings they are easily attached to fences, walls or directly onto your mailbox.

Zanda's new range of mailboxes are designed to be both modern and functional. Each design incorporates a solid structure and exceptional attention to detail, resulting in a product of very high quality.

100 Numerals & Alphabets

FINISHES, CARE & MAINTENANCE

Standard Stock Finishes

Some finishes only available to certain products.

Special Finishes To Order

Available to most of the Zanda range, although some may be limited due to base metal of product. Special order products are non-returnable.

Natural Finishes available on solid brass items only. AB can be achieved on selected products (please enquire).

Care & Maintenance

Brass

The high polish of Zanda products is treated with a clear protective coating to provide durability. Brass, like sterling silver, will gradually tarnish and take on an antique appearance.

Atmospheric conditions, caustic agents such as paints, or scratches from sharp objects may cause the protective coating to crack or peel causing spotting and discolourations. However, the beauty of the metal can be maintained by taking a few simple steps. Initial care for brass requires only a quick rub with Windsor Wax Polish and light buffing with a soft cloth. You may prefer to do this weekly, especially in exterior, often used or damp environments.

"Blue Magic" Metal Polish is a quick, effective way of restoring mildly tarnished brassware. If heavy discolouration occurs the finish can be restored by stripping the remaining lacquer and polishing regularly with "Blue Magic". Alternatively let it age naturally to an antique finish. The beauty of solid brass is that it can always be restored to its original lustre.

Stainless Steel

To aid the longevity and appearance of quality Zanda stainless steel product we recommend that it is kept clean and a metal polish such as "Blue Magic" be applied periodically. Atmospheric conditions, salt deposits, acids, caustic agents, cement or dust on construction sites all have the potential to cause discolouration to the surface. If this occurs do not be concerned as usually this is not the stainless steel itself but particles clinging to its surface. The product can be revived by following the above maintenance procedure and repeating regularly. This small amount of routine care can only preserve the elegance of your Zanda stainless steel hardware.

Leather

Zanda's range of fine Italian leather products are protected by a urethane covering. Even so, they will need gentle care and maintenance to keep them in top condition. Clean leather products regularly with a soft, damp cloth as dirt and grime can act as abrasives on leather. Use an appropriate leather furniture conditioner periodically as required. This will depend on frequency of use of the hardware and proximity to sunlight. Wipe off food and body oils as soon as possible as they will oxidise and change the colour of the leather. Don't use water, cleaning solvents, soaps or ammonia based products to clean the leather; Water based stains will leave a permanent mark. This small amount of routine care can only preserve the elegance of your Zanda leather hardware.

Roman Brass / Natural Bronze / Oil Rubbed Bronze

The finish on Zanda's architectural brass products is an oxidation treatment which continues to age when it comes in contact with the atmosphere. Over time, the natural patina of the bronze finish will give way to an aged brass finish in heavy use areas. For care & maintenance, a gentle wipe with a damp cloth should keep your architectural brass hardware in top condition.

Black Iron

Zanda's Black Iron range has a powdercoated finish. Iron naturally oxidises, especially when exposed to the weather, and this can occur if the powdercoating is scratched or chipped. The iron itself will not deteriorate with oxidation, other than the discolouration of the surface, as the oxidation forms a skin on the surface unlike steel which continues to rust. Small chips can be touched up with a black wax crayon as the wax will provide weather protection. Larger areas can be restored with a black etch paint such as PA10.

- » Suitable for approx. 20 Grubscrews

OUR SERVICES

Keying

Zanda offer the following keying services:

Keying Alike (KA): Allows for a number of locks to be operated by the same key.

Keyed to Differ (KD): Each lock can only be opened by its own unique key.

Construction Keying (CKA): This system is used to allow contractors to gain entry to a building during construction but to prevent entry by the same contractors after the building has been occupied or handed over. On completion of the building, the owners key is activated rendering the construction key inoperative and preventing further entry by the contractor.

Master Keying (MKA): Each lock will have its own individual key which will not operate any other locks in the system, but where all locks can be operated by the one master key.

Grand Master Keying (GMKA): An extension of the master keyed system where each lock has its own individual key however the locks are divided into two or more groups. Each lock group is operated by a master key, and the entire system is operated by one grand master key.

Maison Keying (MAIKA): This is widely used in apartments, flats, offices, and hotels. Each unit has its own key which will not operate the locks to another unit but will however, operate the locks to communal entrances and service areas such as a gym.

Special Finishes

An addition to our beautiful standard finishes, Zanda offer a number of stunning high quality and durable special finish options on most of our products, giving your project that extra distinctive touch.

Our special finish service ensures your handles coordinate perfectly with your color scheme. Whatever your idea is, we have the ability for all the hardware in whichever finish you desire.

Training to boost your team

Zanda is renowned for their fun and inspirational training workshops. We have a range of enjoyable and insightful training programs to inspire your teams and ramp up product knowledge.

Installation Service

Watch this space for more information on our installation service and our Approved Installers program, due November 2015.

OUR SERVICES

Dedicated Account & Project Managers

Ordering and specifying architectural hardware can be a complicated process. Our experienced account and project managers are equipped with the knowledge and expertise so your ordering process or project can be completed seamlessly. Not only are they equipped with exceptional customer service skills, they offer high levels of integrity, an excellent work ethic and a commitment to go beyond what our customers would ever expect. Contact us to request a dedicated account manager or a project manager for an upcoming job.

Door Hardware Scheduling

Zanda offers a full door hardware scheduling service for builders, architects and designers to save you time and money throughout your planning process. This ensures that all items are compatible together, Australian regulations are met, every door type and configuration is accounted for, the finishes are consistent throughout your project and potential pitfalls are prevented. Just provide us with your floor plans and we'll prepare a detailed door by door schedule that fully addresses your requirements.

Door-set Packaging

Let us do the work. Where necessary, your hardware can be delivered pre-packed in door by door packages. Each individual door will have its own clearly marked box that contains all the hardware items required for that door. You can call up your deliveries in units or areas. This valuable service saves on installation time, reduces confusion and errors, and eliminates product getting lost or damaged on site.

Technical Support

Our team pride themselves at being experts in their field. We place great emphasis on phone skills and our staff are regularly put through in-house and external training programs to further their customer service skills and technical product knowledge. What's more, we guarantee we'll answer your call within 10 seconds during standard business hours. So go on, call our team of experts on **1300 ZANDA1**.

Glossary of Terms

Active Door The door in a double door set that is opened first and to which a functionable lockset is applied.

Backcheck A function on a door closer which provides a cushioning effect when the door is forcibly thrown open. This does not serve as a substitute for a door stop.

Backset The horizontal distance from the face of the lock to the centre of the bore or cylinder hole.

Case The housing of a lock, latch or bolt

Closing Speed The speed at which the door closes from the fully open position to 15-0. This can be adjusted by the valve on most door closers.

Cylinder Barrel A cylindrical portion of the cylinder that rotates when the correct key is used.

Cylinder The assembly incorporating the key operated mechanism.

Deadbolt A lock bolt having no spring action and is operated by a key or turnsnib. When locked the bolt cannot be returned by end pressure.

Delayed Action Provides prolonged closing time to assist the passage of wheel chairs, less abled people and people with prams, shopping etc.

Double Cylinder A locking cylinder barrel controlled by a key on both the outside and inside.

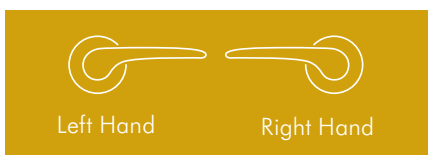

Dummy Set A non functioning handle for one side of the door that has no latching or locking function. It is surface mounted to a door simply so the door has a handle to pull it open. They are generally used on closet, wardrobe or linen cupboard doors with a catch.

Edge Pull A recessed pull morticed into the edge of a sliding door which enables a user to pull out a door that is completely inside a cavity.

Fixed Pin Hinge A hinge in which the pin is fastened permanently in place, preventing separation of the two leaves.

Flush Bolt A bolt recessed flush into the edge of the inactive leaf of a pair of doors at the top and bottom to secure a door.

Handed Products A product designed or assembled for use only on right hand doors or only left hand doors, but not both (see handing below).

Hold-open A function on a door closer which enables a door to be held in the opened position until released.

Inactive Door The door in a double door set that does not contain a latch, but instead is bolted at the top and bottom to hold it stationary when shut.

Indicator Bolt A slide-action bolt installed in areas where privacy is desired (such as toilets and bathrooms) which provides visual indication that the room is occupied or vacant.

Jamb Vertical posts or pieces that together form the sides of a door or window frame.

Latch The fastening on a door that fits into the strike slot on a door jamb and is retracted from either side by the handle.

Latching Speed The speed at which the door closes from 15-0. This can be adjusted by the valve on most door closers.

Loose Pin Hinge A hinge having a removable pin to permit the two leaves of the hinge to be separated.

Mortice Lock A lock designed to be recessed into the edge of a door, rather than being mounted to its surface. It combines the latching and locking mechanism into one unit.

Nightlatch A lock with a spring activated latchbolt. Useful where you want to lock a door behind you without a key.

Non-handed The ability to reverse the product or key component to suit left or right-hand installation.

Passage Set Include a lever set and non-lockable latch bolt that allows free access through the door in both directions at all times. Appropriate for internal doors that never need to be locked (Dining Room, Laundry etc).

Power Adjustable By Spring This is where the power size on a closer can be adjusted by turning the allen key, the plates are moved in the body, compressing the spring, which increases the power size.

Power Adjustable by Position This is where the power size on a closer can be adjustable by their position on the door. You increase the strength by positioning the closer away from the hinge or pivot centre.

Privacy Set A term for locks used on bathroom and bedroom doors having an inside button or turn knob to lock the outside handle and usually an emergency function which will unlock the set from the outside.

Rebated Door A door where the leading edge is stepped.

Reversible Lock A lock with the components that can be readily adapted to enable the lock to suit door of either hand, opening in or out.

Rose The decorative backplate attached to the door lever that screws to the door surface.

Single Cylinder A locking barrel controlled by a key on the outside and a turnsnib on the inside for easy exit in an emergency.

Sliding Door A type of door installed on a sliding track that slides into a hollowed space or along a wall. Ideal for space minimisation as they eliminate the necessity to maintain clearance for the action of a swinging door. Sometimes referred to as a Pocket Door.

Spindle The drive shaft connecting the knob or lever to the latch or lock mechanism to operate the bolt.

Split Spindle A spindle having a joint in the centre to allow each side of a handle to operate independently.

Strike A metal plate that receives the door bolt or latch in the door jamb when the door is closed. Also referred to as a Faceplate or Keeper.
