

Chamferboard

Cladding

The perfect match

Traditional cladding that's always in style. Chamferboard in Western Red Cedar, is a beautiful and traditional external cladding that harks back to Colonial architecture. Often used in extensions and renovations, Chamferboard can blend in easily to existing structures. The cladding is also available in the more economical fingerjoint Western Red Cedar.

Chamferboard features and benefits

- Carefully machined to three standard widths
- 18mm thickness gives excellent stability and insulation
- Other sizes available if required to match existing buildings
- Clear grade Western Red Cedar is ecologically sound
- Profile is to be face nailed
- Can be painted or finished in its own natural golden tones
- Excellent watershedding
- For horizontal applications

Chamferboard is ideal for

- Traditional buildings
 - both residential and commercial
- Colonial-style buildings (i.e. those with verandahs, and timber doors and windows)
- Multi-story or single level
