

# Channel Clad with Centre Groove

Cladding

Panelling

## Remarkable effects

Deep shadows contrast with broad highlights. Channel Clad with Centre Groove, brings a dramatic appeal to both interiors and exteriors. The wide, deep channels and broad, flat panels create a very prominent batten effect. Made from Western Red Cedar, Channel Clad with Centre Groove can be used vertically or horizontally.

## Channel Clad with Centre Groove features and benefits

- Heavy, distinct channels and shadowlines
- Machined drip grooves for horizontal installation
- FSC and PEFC timber options
- Interchangeable with other profiles
- To be face nailed on external applications
- Excellent environmental credentials
- Ideal for commercial features

### Get creative!

Can be interchanged with the Channel Clad product range.

## Channel Clad with Centre Groove is ideal for

- External walls on architectural designs
- Alfresco ceilings
- Internal feature walls and ceilings
- Entrances
- Internal rooms that require acoustic values
