

Shingles

Cladding

Celebrate the outdoors

Natural beauty that's tried and tested. Our shingles are an excellent exterior wall and roof cladding that is ideal for Gazebos and outdoor rooms. The many benefits of Western Red Cedar Shingles include durability, exceptional insulation and low maintenance. It's their natural texture and aesthetic beauty, however, that make them so desirable. Shingles can be easily used in new construction as well as remodeling. We recommend a good coat of Cutek penetrating oil to give extra protection, stability and longevity.

Shingles features and benefits

- Low maintenance
- Excellent longevity
- Can be cut to required shape and size easily
- Available in random widths to enhance 'hand split' effect
- Available in two different grades
- Fine sawn finish

Shingles is ideal for

- Gazebos, outdoor rooms, pool rooms
- Unusual roof and wall shapes
- Side walls and roofs
